3 In experiments characterized by N measurements of the same quantity, we can display data in the form of a histogram which has on the vertical the fraction F_i of the N measurements that gave the result x_i (where $i = 1, 2, 3, \dots, N$) and on the horizontal the measured values x_1, x_2, \dots, x_N . As the number of measurements increases, the histogram changes into a quasi-continuous
