A brickfilm is a film made using Lego bricks, or other similar plastic construction toys. They are usually created using stop motion animation, computer-generated imagery (CGI) or traditional animation and sometimes include live action films featuring plastic construction toys (or representations of them). The term “brick film” was coined by Jason Rowoldt, founder of Brickfilms.com.

With your hot glue gun, put a little hot glue on the bottom of your toy. Using the needle nose pliers, put it down into your jar where you want it. Press it down a little to get it firmly in place. Let the glue dry for 10 minutes. Fill your jar with water. Put one small squirt of glycerin in it (this is going to make your "snow" float better.)
